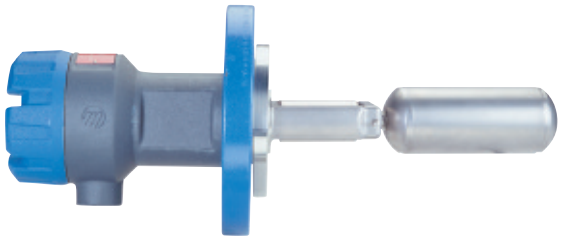
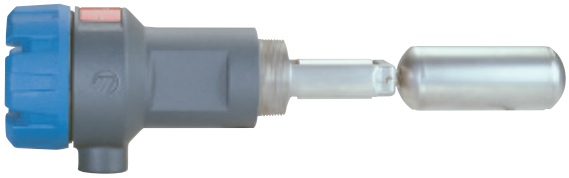
MAGNETROL® / AMETEK®
LEVEL MEASUREMENT SOLUTIONS

Tuffy® II Liquid Level Controls with Electric Switches

DESCRIPTION

The Tuffy® II Liquid Level Switches are float-actuated devices designed for horizontal mounting in a tank or vessel through threaded or flanged pipe connections. The compact size allows for installation in small vessels, while its many features provide a variety of application uses. The single switch mechanism is available in SPDT or DPDT forms on units designed for fixed or adjustable, narrow or wide differential and interface service levels. This bulletin covers TUFFY II level controls with electric switches. For TUFFY with a pneumatic switch, see bulletin 44-109.





TECHNOLOGY

The Tuffy II achieves switching action through the use of a magnetic switch mechanism and a magnet attached to the float assembly. Separating the two magnets is a non-magnetic pressure barrier.

As the liquid level changes, the float, and therefore the float magnet, moves. The float and switch magnets repel each other causing movement of the switch magnet assembly, tripping the switch and making or breaking an electrical circuit.

FEATURES

- Pressure ratings to 2625 psi (181 bar)
- Process temperatures to +900 °F (+482 °C)
- Cost-effective clad flange design option
- NACE, ASME B31.1 and ASME B31.3 construction
- Specific gravity as low as 0.40
- SIL 2 suitable (FMEDA report available upon request)

APPLICATIONS

- Sour service (NACE)
- High/low alarm
- Single pump control
- Day storage tanks
- Corrosive processes (Hastelloy® C wetted parts)
- Process vessels
- Boiler low water cut-off
- Interface level
- Explosion proof installations

ADDITIONAL FEATURES

- Carbon steel with 316 SS, all 316 SS or all Hastelloy C wetted components
- Enlarged switch enclosure for wiring ease
- Explosion proof NEMA 4X/7/9 enclosure
- All models available with FM, CSA and ATEX approvals
- Choice of cast aluminum or cast iron switch enclosure
- Interface service with 0.10 minimum specific gravity difference
- External cages available in carbon steel and 316 stainless steel
- Fixed narrow differential models
- Adjustable wide differential models
- Wide selection of process connections:
  2" NPT
  3" to 6" ANSI flanges
  ANSI flanges pressure classes from 150# to 1500#
- Wide selection of switches:
  SPDT or DPDT
  Silver or gold contacts
  Dry contact
  Hermetically sealed

PHYSICAL SPECIFICATIONS

Measured Variable:	Liquid level	
Deadband:	Narrow differential = 0.50"	
	Wide differential = up to 18.26"	
	Interface service differential 1.72"	
Float Material:	316 stainless steel or Hastelloy C	
Float Holder:	Investment cast stainless steel	
Flange Materials:	Carbon steel, 316 stainless steel, 316 stainless steel clad carbon steel	
	Hastelloy C, or Hastelloy C clad carbon steel	
Process Connections:	2" NPT, 3" to 6" ANSI flanges in 150# to 900# pressure classes	
Maximum Process Pressure:	2630 psig (181 bar)	
Ambient Temp. Range*:	0 to +100 °F (-18 to +38 °C)	
Process Temp Range*:	**Cast Iron Housing**	**Cast Aluminum Housing**
HS with silver contacts	-65 to +750 °F (-54 to +399 °C)	-65 to +650 °F (-54 to +343 °C)
HS with gold contacts	-65 to +750 °F (-54 to +399 °C)	-65 to +650 °F (-54 to +343 °C)
Snap with silver contacts	-40 to +750 °F (-40 to +399 °C)	-40 to +650 °F (-40 to +343 °C)
Snap with gold contacts	-40 to +375 °F (-40 to +190 °C)	-40 to +325 °F (-40 to +162 °C)

* For ambient temperatures outside of the listed range, consult factory or bulletin 44-607 for maximum allowable process temperature.

ELECTRICAL SPECIFICATIONS

Signal Output:	Switch closure
Type of Contacts:	SPDT or DPDT
Contact Material:	Silver or gold
Type of Switches:	Dry contact or Hermetically sealed
Switch Ratings:	Up to 10 amps @ 120/240 VAC
	Up to 6 amps @ 24 VDC
Enclosure Rating:	NEMA 4X/7/9, Class I, Div 1, Groups B, C & D, IP66
Enclosure Material:	Cast aluminum or cast iron
Cable Entry:	¾" NPT

Special conditions for safe use:

① When the material is equipped with an aluminum enclosure, all precautions shall be taken to avoid all impacts or frictions which can result in the ignition of the potentially explosive atmosphere.

MODEL NUMBERS

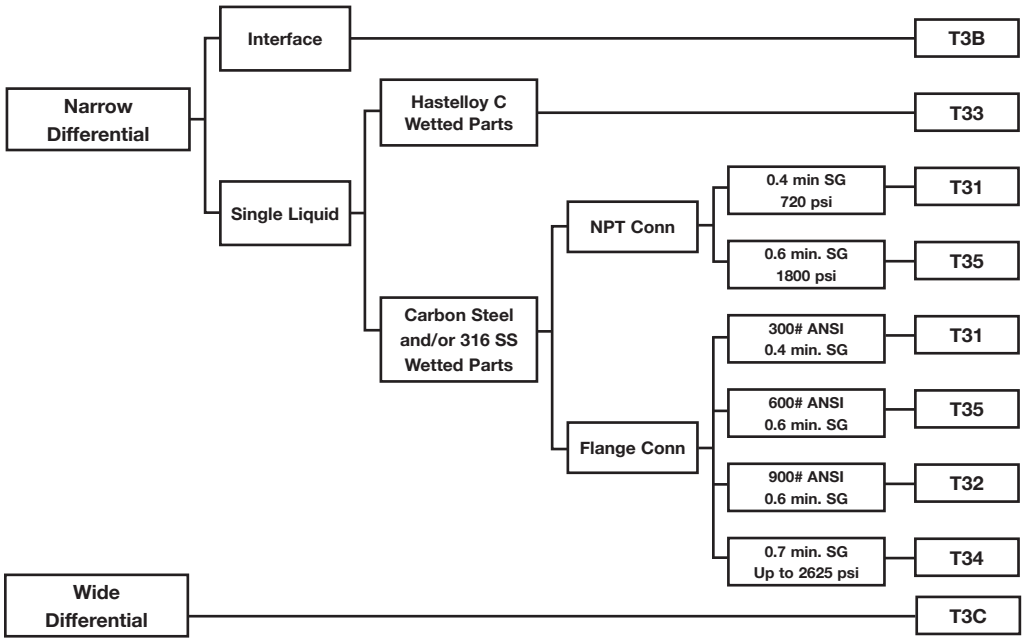
Narrow Differential: Switch differential of approximately 0.5" (1.7" on interface unit), for actuation of an alarm or system shutdown.

Interface Service: Switch to detect the interface between two liquids with SGUs that differ by at least 0.1.

Single Liquid: Switch to detect the top of layer of a single liquid with no other liquid above it.

Adjustable Differential: Wide switch differential from approximately 1.36" to 18.26", which may be adjusted in the field by repositioning pins on the adjustment plate.

BASIC MODEL FLOW CHART



MODEL NUMBER

QUALITY

MAGNETROL REGISTERED TO ISO 9001 Your Assurance of Quality and Service

The quality assurance system in place at Magnetrol® guarantees the highest level of quality throughout the company. Magnetrol is committed to providing full customer satisfaction both in quality products and quality service.

The Magnetrol quality assurance system is registered to ISO 9001 affirming its commitment to known international quality standards providing the strongest assurance of product/service quality available.

Ship
Plan

Several Tuffy II Float Level Switches are available for quick shipment, usually within one week after factory receipt of a complete purchase order, through the Expedite Ship Plan (ESP).

To take advantage of ESP, match the color coded model number codes in the selection charts (standard dimensions apply).

ESP service may not apply to orders of ten units or more. Contact your local representative for lead times on larger volume orders, as well as other products and options.

WARRANTY

All Magnetrol mechanical level and flow controls are warranted free of defects in materials or workmanship for three full years from the date of original factory shipment.

If returned within the warranty period; and, upon factory inspection of the control, the cause of the claim is determined to be covered under the warranty; then, Magnetrol will repair or replace the control at no cost to the purchaser (or owner) other than transportation.

Magnetrol shall not be liable for misapplication, labor claims, direct or consequential damage or expense arising from the installation or use of equipment. There are no other warranties expressed or implied, except special written warranties covering some Magnetrol products.
